

# Energy-related partnering opportunities

March 2026

## Renewable energies

Technology offer TOES20260305019

[A Spanish University has created a heat-resistant solar receiver with an extended service life](#)

Technology offer TODE20260306011

[Thermomechanical recycling technology for silver and silicon recovery from end-of-life solar panels](#)

Technology offer TOTR20260316003

[This university is one of the most successful universities in Turkey, which has an expert staff in the Department of Energy Systems Engineering in Turkey, aims to participate as a partner in international projects in this field.](#)

Technology offer TOTR20260318003

[A Turkish company, an experienced R&D company in Energy and Aviation, wants to join an international project as a partner.](#)

Business Offer BOTR20260323013

[Turkish company produces electrical and electronics products for EVs \(Electric Vehicles\) and RESs \(Renewable Energy Systems\), is looking for commercial and potential partners from around the globe.](#)

Technology offer TOES20260326005

[A Spanish University has developed a low-cost solar simulator for the characterization of photodetectors and solar cells](#)

Technology offer TOES20260326004

[A Spanish University has developed a heliostat mirror alignment system for tower solar power plants](#)

Business Offer BOLT20260316034

[A Lithuanian renewable energy equipment supplier offering photovoltaic modules, solar inverters, battery storage systems and heat pumps to installers, engineering companies, energy project developers is seeking partners to work under a commercial agreement](#)

Business Offer BOLV20260330025

[Latvian company offers turnkey EPC services for solar and wind park infrastructure, substation construction, and high-voltage grid connections in the Baltic and Nordic regions](#)

## Other topics (energy conservation, storage, distribution, etc.)

Technology offer TOCH20260302021

[Swiss SME expert in life cycle assessment \(LCA\), carbon footprint and LCA databases seeks R&D collaborations](#)

Business Offer BOTW20260302005

[Taiwan-based manufacturer providing high-voltage systems \(OBC, DC/DC\) for OEMs and charging stations for CPOs, with ODM/EMS expertise supporting 400V/800V platforms and Plug & Charge technology.](#)

Technology offer TOES20260309002

[A Spanish University has created a space plasma thruster with dual magnetic nozzle.](#)

Technology offer TODE20260302010

[Partners sought to develop robust LiDAR-based monitoring systems for subsea Infrastructure using unmanned underwater vehicles \(UUV\)](#)

Technology offer TOTR20260306005

[A Tech Startup from Türkiye, Developing a Device-based Thermal Digital Twin for industrial facilities, is Seeking Companies That Can Assist in Scaling and Implementing its own Technology.](#)

Business Offer BOIT20260310016

[Italian company developing dual-use portable energy generators for defense, emergency response, blackout resilience and off-grid operations](#)

Technology offer TODE20260310025

[German university-based Research Institute offers Design and Reliability Testing of High Frequency Wide Bandgap Based Power Electronic Systems](#)

Technology offer TODE20260312012

[Techno-economic analysis for autonomous road infrastructure expertise offered for research projects and commercial cooperation](#)

Business Offer BOTR20260313028

[Eco-Friendly Thermal, Acoustic and Fire Insulation Solutions from Türkiye Available for European Markets](#)

Business Offer BOTR20260313006

[Turkish Company at the field of Water&Energy Systems is looking for business partners from globe under investment agreements.](#)

Technology offer TOES20260316009

[A Spanish research institute offering expertise in innovative bioprocesses to convert syngas and carbon monoxide into biohydrogen for the Clean Hydrogen JU topic HORIZON-JU-CLEANH2-2026-01-05 \(HORIZON-JU-CLEANH2-2026-01-05\)](#)

Technology offer TOUA20260319011

[New technologies for energy, environment and biomedical applications](#)

Business Offer BOFR20260317009

[French manufacturer of heating elements is searching for distributors](#)

Business Offer BOUA20260320016

[Software engineering company offering cloud-based platforms and industrial internet of things solutions for property management and smart building operations](#)

Business Offer BOTR20260323005

[A Turkish company that provides unique and professional solutions for energy storage and conversion systems, is looking for partners under Commercial, Outsourcing, Supplier, and Investment agreements.](#)

Technology request TRVN20260326006

[Vietnam-based energy company seeks smart-grid and power system technology partners to improve grid reliability and asset management](#)

Business Offer BOSI20260324002

[Slovenian company developing advanced catalytic materials for green hydrogen production and industrial decarbonisation](#)

Business Offer BODK20260324025

[Danish producer of lifting Equipment for Cranes is looking for Agents and Distributors.](#)

Business Offer BOTR20260325003

[A Turkish company specialised in battery pack and battery management system design is looking for partners through a commercial agreement.](#)

Technology request TRES20260326014

[ERIA Acceleration Programme: ideas and technological solutions in the Energy sector](#)

Business request BRDK20260326010

[Danish Producer of Crane Lifting Equipment Seeking Manufacturing Partner](#)

Business Offer BODE20260327004

[German provider of multi-asset energy optimization software for energy-intensive manufacturing offers cost-saving software products to industrial-scale manufacturing and logistical sites.](#)

Technology offer TODE20260327008

[German provider of multi-asset energy optimization software for energy-intensive manufacturing seeks technical/sales partners that offer products and services to industrial scale manufacturing sites or logistical sites.](#)

Research & Development Request RDRPT20260330013

[Portuguese SME seeks research and industry partners for Eureka Eurostars project on kinetic energy harvesting technologies for smart city applications](#)

Technology offer TOFR20260331013

[A Brittany based academic technical platform, specialized in composite materials and additive manufacturing, is seeking collaboration with Project partners for the HE Clean Hydrogen call HORIZON-JU-CLEANH2-2026-02-01](#)

Research & Development Request RDRES20260331023

[HORIZON-CL5-2026-09-D2-01: Lithium-ion battery gigafactory and graphite-producing company sought for a project aimed to develop synthetic graphite and/or alternative carbon-based materials from European bio-based feedstocks for battery components](#)

 Business Offer BOFR20260331028

[A French-based SME offers an energy-hub with a power range of 1 to 10 MW for industrial sites facing energy grid congestion and willing to improve renewable energy integration while peak-shaving its electricity consumption.](#)

 Technology offer TOTR20250102011

[A Turkish Company Looking for partners \(ie.battery pack / cooling plate / battery cooling solution manufacturers\), cooling plate for Hardware and AI-Driven Cooling Solutions for Enhanced Battery Pack Performance](#)

 Business Offer BOR020251022008

[A Romanian engineering company is looking for project partners in multiple sectors like water engineering, environmental sustainability and energy.](#)
