

Energy-related partnering opportunities

May 2026

Renewable energies

Business Offer BODE20260414013

[German company offers nanotechnology-based coating for photovoltaic modules to increase energy yield and reduce soiling losses under commercial agreement](#)

Technology offer TOHU20260512016

[Ejector based vapor re-compression distillation- sea/waste water desalination- cleaning- high temperature heat pump](#)

Technology offer TOES20260513023

[Spanish SME developing modular solar mini-grids and intelligent storage systems for rural areas seeks international technological partners.](#)

Technology request TRUA20260429020

[Ukrainian ice cream manufacturer seeks green energy, heat recovery and decarbonisation technologies for pilot deployment and joint grant-based projects](#)

Technology offer TOIT20260514013

[Italian company offers a modular low-altitude airborne wind energy system for high-density scalable deployment.](#)

Business Offer BOGR20260513024

[Greek engineering company specializing in high-capacity solar systems and energy storage seeks international commercial partnerships](#)

Business Offer BODE20260528017

[German provider of automated photovoltaic power forecasting with continuous monitoring and retraining for large-scale renewable portfolios.](#)

Other topics (energy conservation, storage, distribution, etc.)

Technology offer TOES20260506013

[A Spanish software company specializing in climate data processing and machine learning is seeking organizations that are actively looking for tailored climate projections to inform business decisions](#)

Technology offer TOES20260511012

[Power electronics engineering SME is looking for partners to take part in R&D projects related to the development of power converters \(microgrids, back-up power systems, and similar technologies\) and digital twins/Hardware in the Loop](#)

Business Offer BODE20260505017

[Implementation Partner for Energy Transition & Resilience Programs - Offering Strategy-to-Execution Support and Seeking Long-Term Project and Technology Partnerships](#)

Research & Development Request RDRIT20260511009

[The Municipality of Rende seeks EU municipalities willing to act as transfer partners for a project proposal under the Fourth Call for Proposals of the EUI - Innovative Actions initiative](#)

Business Offer BOPL20260512007

[Polish company offers advanced servicing solutions for medium and high voltage electrical equipment including SF6 technology.](#)

Technology offer TODE20260430016

[Innovative compact power cable system for faster and lower-cost electricity network expansion. Seeking partners to commercialise a high-capacity water-cooled solution for transmission & system operators, utilities and infrastructure projects.](#)

Technology offer TOIT20260514002

[Italian Research Institute offers innovative day-ahead electricity price forecasting services and tailored power market predictive models](#)

Business Offer BOGR20260519021

[Greek company offers intelligent EV charging software and energy management solution and seeks commercial and project partners](#)

Business Offer BOFI20260519012

[Finnish company offering real-time electricity consumption monitoring for large properties seeks public sector and property management partners in Belgium, the Netherlands and Sweden](#)

Technology offer TOCH20260520011

[Swiss deep-tech AI company offers advanced machine learning techniques for autonomous control of critical industrial systems with up to one hundred independent variables. Targeting energy, manufacturing, medical and critical infrastructure.](#)

Business Offer BODE20260528015

[German developer of AI-driven energy forecasting and optimisation platform seeks deployment and integration partners across Europe](#)

Technology offer TODE20260528016

[AI-based platform for operational management of time-series machine learning models in critical infrastructure environments.](#)

Business Offer BODE20260528018

[German provider of automated load forecasting for energy management, trading and grid operation applications.](#)

Business Offer BOUA20260529022

[The Ukrainian company offers the supply of environmentally safe types of fuel. The company is looking for partners for product sales and cooperation under the export contract.](#)

Business Offer BOES20260526020

[Spanish provider of secure industrial IoT, energy monitoring and smart telemetering solutions for critical infrastructures](#)

Business Offer BOBE20260527004

[International Belgian company specializing in smart energy systems and intelligent EV charging technology, is seeking a distributor and strong local partner in Türkiye.](#)

Research & Development Request RDRDE20260528024

[Seeking Swedish partner with expertise in electric drives, regenerative braking or fuel cell technologies for joint Swedish-German R&D project call 2026](#)

Business Offer BOES20260529008

[Spanish AI-powered energy management software for commercial and industrial battery storage systems seeks technology and commercial partners in the renewable energy sector](#)
